FROM: Manufacturing Sectors Branch

SUBJECT: Recognition of outstanding economic reporting by personnel of the US Embassy, Moscow, Department of State

1. The originator acknowledges with gratitude the extensive, competent and penetrating analyses of debates among Soviet economists and concrete developments related to price formation in the USSR and the relationship between price formation and the search for criteria for selective capital investment. Since early 1957 the Embassy's reports have clearly traced the vicissitudes of the debate on price formation. These have been extremely useful in understanding broad problems of Soviet economic planning.

2. There is continuing interest in reports on this subject.
